Priority  High

Labels [Team2](#)

Description  
Funnels API does not need an authorization to get the list of all funnels.

- Steps:
1. Click on "No Auth" in Authorization tab.
  2. Send a GET request to the URL: `https://cerebrumhubcrmlite.bubbleapps.io/api/1.1/obj/funnel`

Actual result:  
 List of funnels is shown. `200 OK`

Expected result:  
 Error message shown and funnels cannot be shown

Description • Unsaved changes

Limit and cursor values can be with commas, like 555 or 12,2 .

### Steps:

1. Send a GET request to the URL: `https://cerebrumhubcrmlite.bubbleapps.io/api/1.1/obj/funnel?limit=15,5&cursor=2,5`

### Actual result:

 Status message "200 OK" is shown.

### Expected result:

 Status message "400 Bad request" is shown.

Description  
The system lets search by negative limit value and shows success message instead of error message.

Steps:  
1. Send a GET request to the URL: `https://cerebrumhubcrm1ite.bubbleapps.io/api/1.1/obj/funnel?limit=-15`

Actual result:  
 Success message "200 OK" is shown.

Expected result:  
 Error message "404 Not found" is shown.

## Funnels API - funnel created without adding stages

 Attach  Add a child issue  Link issue   Start work

Assignee  Unassigned  
[Assign to me](#)

### Environment

- **OS:** Windows 11 Pro
- **Browser:** Google Chrome v. 114.0.5735.134

Priority  Medium

Labels [Team2](#)

### Description

In API funnel created successfully without adding stages. No error messages in API.

In UI the stage name is empty but funnel has been created and is in the list. Error message shows though when editing the funnel: "No stages | Please create one."

In documentation it says that at least 1 stage is required to create funnels.

### Steps:

1. Send POST request to create a new funnel with no stages added: <https://cerebrumhubcrmlite.bubbleapps.io/api/1.1/obj/funnel>

```
1 {  
2   "members_list_user": [  
3     "1625051658962x581289845978797800",  
4     "1657897085311x920666300518670800"  
5   ],  
6   "name_text": "TRIAL stage funnel",  
7   "stage_list_custom_stage": []  
8 }
```

2. Create GET list for all stages with name text field value "empty": [https://cerebrumhubcrmlite.bubbleapps.io/api/1.1/obj/stage?constraints=\[{"key":"name\\_text","constraint\\_type":"is\\_empty"}\]](https://cerebrumhubcrmlite.bubbleapps.io/api/1.1/obj/stage?constraints=[{)

### Expected result:

✓ Funnel cannot be created when at least one stage is not added. In API error message should be shown. In the UI the new funnel should not show in the list of funnels. There should be no stage names listed without a name.

### Actual result:

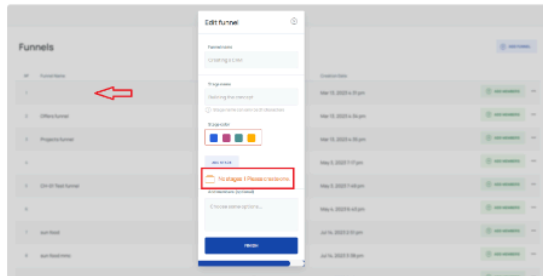

✗ Creating a new funnel is possible without adding stages.

```

1 {
2   "status": "success",
3   "id": "1694846952134x715829538384362000"
4 }

```

✖ In UI error message is shown but the new funnel still shows in the list.

✖ There are stage names listed without a name (text field value "empty").

```

1   "count": 20,
2   "remaining": 0

```

## Notes API, Get the list of all notes - default value of 50 not implemented

Description

When making a request without specifying the "limit" parameter, the API fetches the maximum number of items allowed (100), but the default number of items is specified as 50 in the documentation [Deals and Notes API | Get the list of all deals](#)

Steps:

1. Send GET request to get the list of all notes (with no limits added): `https://cerebrumhubcrmlite.bubbleapps.io/api/1.1/obj/note`

**Expected result:**

The Notes API must return a list of notes with 50 items as a default value.

**Actual result:**

 List of notes defaults to 100, and not to 50.

```
1      "count": 100,  
2      "remaining": 1  
3    }
```
