Environment

**OS:** Microsoft Windows 11, version 22H2

**Browser:** Version 117.0.5938.92 (Official Build) (64-bit)

Priority

High

Labels

Team2

Description

Newly created and invited user cannot update their password. The link sent to email is leading to another user's account.

- Steps:
1. Login to CRM as "Demo User"
  2. Go to the "Profile" page
  3. Click on pencil icon to change the password
  4. Write there recent password, new password and click "Save"

**Actual result:**

Profile information is wrong. The password cannot be updated because the user do not know recent password

**Expected result:**

Profile information in correct. The user can update their password.

Description

The system leads the user in someone else's profile account, it is not secure. And because of that this user cannot be activated. Newly invited user should be activated via link sent to email. User is in "pending" status instead of "active" status.

- Steps:
1. Login to CRM as "Demo Admin"
  2. Go to the "Team" page
  3. Scroll down and search for added user

Actual result:

 User is added, visible but has "pending" status

Expected result:

 User is added, visible and has "active" status

[Team2](#)

Description

User cannot delete lead created by themselves. User cannot find their lead by search also.

- Steps:
1. Login CRM as "Demo User"
  2. Go to the "Leads" page
  3. Search by full name : "Apple Pie"

Actual result:

"Search by" gives options but when click on that, it does not give any results. Lead cannot be found nor deleted.

Expected result:

Lead is visible by search and can be deleted
